DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to a bread maker, classified in class 366, subclass 146.
- II. Claim 6-8, drawn to a method of controlling a bread maker, classified in class 426, subclass 523.
- III. Claims 9-11, drawn to a bread maker to make bread, classified in class 099, subclass 348.
- IV. Claims 12-15, drawn to a method of controlling a bread maker having an oven, classified in class 219, subclass 400.
- V. Claims 16- 20, drawn to a method of attaching and removing a mixing bag, classified in class 366, subclass 314.

The inventions are distinct, each from the other because of the following reasons:

The inventions as claimed are independent since they are not connected in design, operation or effect, i.e., each invention is separately usable and the operation, design and effect of one is independent of the other.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
